

# NISHIT JAIN

## Senior Software Engineer @ Solytics Partners

+91-8268581687 ◇ nishitjain120420011@gmail.com ◇ <https://www.linkedin.com/in/nishit-jain1>

## SUMMARY

---

**Backend engineer with 4+ years of experience** in designing and scaling distributed systems. Proven expertise in designing and building **high-throughput systems**. Strong track record in system ownership, automation, and optimizing reliability in mission-critical platforms.

## EXPERIENCE

---

### Senior Software Engineer

*Solytics Partners Pvt. Ltd.)*

March 2026 – Present

*Pune*

- Mentored junior engineers in event-driven design patterns, resilient API development, and Python best practices.
- Delivered **2 major releases** right in the first 30 days
- Partnered with product and cross-functional stakeholders to translate business goals into a clear technical roadmap and execution plan.

### Software Development Engineer

*Fynd (Reliance Retail Ltd.)*

May 2024 – March 2026

*Andheri*

- Architected a **decoupled, stateless middleware** to power real-time data synchronization and workflow orchestration, incorporating configurable retries, fault-tolerant execution, and comprehensive observability.
- Engineered resilient, idempotent communication workflows that scaled seamlessly to process **10M+ monthly requests** across mission-critical retail systems.
- Designed and scaled a modular delivery partner integration to automate the end-to-end logistics lifecycle including AWB creation, e-way bill generation, labeling, and delivery status callbacks, driving operational efficiency with **20+ courier partners and 900+ vendors**.
- Implemented a Kafka-based event-driven architecture, ensuring high-throughput asynchronous processing for time-sensitive workflows.
- Optimized authorization performance with a cache-aside strategy, reducing request latency and scaling to **100K+ AWB generations per month**.

### Backend Developer

*HappyFox Technologies*

September 2023 – April 2024

*Bangalore*

- Developed and maintained backend services using Python, contributing to scalable and high-performance customer support and helpdesk solutions.
- Designed and implemented RESTful APIs, ensuring reliability, security, and seamless integration with internal and external systems.
- Wrote clean, reusable, and well-documented code following industry best practices, coding standards, and code review processes.

### Software Developer

*GrayQuest Education Finance*

Dec 2021 – September 2023

*Mumbai*

- Spearheaded the development of **Auto-Debit**, a subscription-based model for course payments, resulting in a **30% increase in customer retention**.
- Developed and maintained a fully automated system end-to-end loan verification and disbursement process with retries and failure detection mechanism achieving a **70% reduction in processing time**.

## TECHNICAL SKILLS

---

|                     |                                     |
|---------------------|-------------------------------------|
| <b>Languages</b>    | Python, SQL                         |
| <b>Frameworks</b>   | Django, FastAPI, SQLAlchemy         |
| <b>Databases</b>    | PostgreSQL, MySQL, MongoDB          |
| <b>DevOps/Infra</b> | Docker, Kubernetes, Kafka, Temporal |

## EDUCATION

---

|                                                                                           |                                        |
|-------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Datta Meghe College of Engineering , Airoli</b><br><i>BE in Information Technology</i> | July 2018 - July 2022<br><i>7.7/10</i> |
